PERMIT FEE: \$100.00

Attach to the application the following information as applicable:

- Plans in duplicate, drawn to scale showing the nature, dimensions, and elevations of the area in question;
- Existing or proposed structures, fill, storage of materials, drainage facilities; and,
- The location of the foregoing - *specifically, the following information is required:*
 - 1) Mean Sea Level (MSL) elevation of the lowest floor (including basement) of all structures;
 - 2) MSL elevation to which any structure is flood proofed;
 - 3) Certification by a registered professional engineer or architect that the flood proofing methods meet the community flood proofing criteria;
 - 4) A description of the extent to which any watercourse will be altered or relocated;
 - 5) Base (100-year) flood elevation data for a development or subdivision greater than 50 lots or 5 acres;
 - 6) Copies of 404 Permit, Mined Land Reclamation Permit, discharge permit, air pollution control permit and other necessary state and federal permits;
 - 7) Certification by a registered professional engineer that development in the floodway will not result in the increase of flood levels during the occurrence of the base flood discharge;
 - 8) Any other information and plans necessary to show compliance with floodplain management regulations;
 - 9) Name, address and telephone number of the owner of the property affected; and,
 - 10) Legal description of the affected property.

Applicant and owner agree that as a condition of permit approval, applicant and owner will provide maintenance within an altered or relocated portion of any watercourse so that flood carrying capacity will not be diminished.

Applicant

Owner

The following is to be completed by the Permit Official:

FLOOD HAZARD DATA

Watercourse Name: _____

The project is proposed in the: Floodway Floodway Fringe

Base (100-year) flood elevation(s) at project site: _____

Elevation required for: Lowest Floor _____ / Flood proofing _____

Source Document/Report/Maps: _____

Proposal Review Checklist

- Site development plans depict the floodway and base flood elevations
- Engineering data is provided for map and floodway revisions
- Floodway certification and date document no increases in flood heights
- Subdivision proposals minimize flood damage and protect utilities
- Lowest floor elevations are 1' above the base (100-year) flood level
- Manufactured (mobile) homes are elevated and adequately anchored
- Non-residential flood proofing designs meet NFIP water-tight standards
- Other: _____

Public Works, Utilities, Planning & Building Director Review
